

WBT-0210 Ag Ms

E

Component list

1	Signal conductor 'Plus', fine silver	1
2	Signal conductor 'Minus', fine silver	1
3	Contact spring bronze	1
4	Nut brass, gold plated	1
5	Marking ring Badamid B70 GF10 ¹⁾	1
6	Base element PA 6.6 fibre-glass reinforced	1
7	Distance ring PA 6.6 fibre-glass reinforced	1
8	Distance ring PA 6.6 fibre-glass reinforced	1
9	Double step washer PA 6.6 fibre-glass reinforced	1
Extent of delivery 1 – 9 mounted		
Revision date 14.12.2006		

1) Badamid is a registered trade mark of Bada AG • WBT und nextgen are registered trade marks of WBT GmbH

recommended mounting

WBT-0210 Ag Ms
Characteristic impedance 75Ω
RoHS compliant

WBT - 0210 Ag Ms Coaxial Socket nextgen™

(Internat. Pat. EP 0 460 145 B1)

Coaxial socket for cabinet mounting, *soldering version*

1. Mechanics

- One-piece low tolerance contact elements (Tol. $\pm 0,02\text{ mm}$)
- Outer conductor with low capacitance patented contact form
- Inner socket with well defined contact surface, WBT active spring mechanism with enclosing beryllium spring; large spring travel for constant contact pressure even with imprecise counter pieces

2. Materials

- Signal conductor (1) and (2) fine silver
- Base element (6) High strength fibre-glass reinforced Polyamide
- Mounted parts (7), (8) and (9) fibre-glass reinforced Polyamide 6.6
- Marking ring Badamid B70 GF10
- Counter nut gold plated brass

3. Surfaces

- Signal conductor Ag, passivated
- Counter nut gold plated without ferromagnetic intermediate layer

4. Operating Characteristics (reliable observed after more than 10^3 connections/disconnections)

- Permanent current $I_D > 20\text{ A}$
- Transition resistance $R_{tr} < 0,1\text{ mOhm}$ (loop measured with WBT -0110)
- Contact resistance $R_{ct}, R_{ca} < 0,1\text{ mOhm}$ (patch resistance, inner / outer)
- Self capacitance $C \approx 2,5\text{ pF}$
- Insulation resistance $R_{is}, R_{ic} > 10^{10}\text{ Ohm}$ (conductor/ conductor, conductor /chassis)
- Characteristic impedance $Z = 75\text{ Ohm}$

5. Terminals

- solder, for cables up to $1,5\text{ mm}^2$

6. Mounting

- problem-free by hand using the knurled nut
- recommended distance between socket centres: $17,78\text{ mm} = 7/10\text{ inch}$ (standard)
